EDUCATION

2021 - 2024

DUY TAN UNIVERSITY

GPA: 3.4/ 4.0

SKILLS

DESIGN

- Bootstrap, Tailwind, ShadcnUI

FRONT-END

- VueJS, ReactJS, NextJS, Typescript

BACK-END

- PHP (Laravel), NodeJS, NestJS

PRIZE

- Second Prize at DTU's Computer Science School Scientific Research Student Conference
- Second Prize at DTU Scientific Research Student Conference

PROFILE

I am a proactive and collaborative web developer who values teamwork and innovation. I believe in creating dynamic web applications that inspire and bring value to users.

WORK EXPERIENCE

Supported students at the center for 3 months, working on web development using Vue.js and PHP. Assisted in building and maintaining applications used in teaching courses, gaining practical experience in real-world web development.

PROJECTS

Neko Cinema - Online Movie Streaming Website   01/2023 - 03/2023

Technology: PHP (Laravel), VueJS, MySQL, RESTful API

Decscription

- Developed an online movie streaming website using PHP (Laravel) for the backend and VueJS for the frontend.
- Created RESTful APIs to manage movie data, users, and reviews.
- Built an interactive user interface with Vue.js, managing state with Vuex and handling navigation with Vue Router.
- Integrated video playback functionality and episode selection features.
- Implemented user registration, login, and movie rating system.

Twitter-Clone API   09/2024 - 01/2025

Technology: Nodejs, MongoDB , Typescript, Docker

Decscription

- Built a Node.js backend API for a Twitter-like application (no UI).
- Implemented Google OAuth 2.0 for authentication and Nodemailer for email notifications.
- Core features: user management, tweet operations, and real-time notifications using Socket.io.
- Containerized the application with Docker for consistency and ease of deployment.
